3M Traffic Safety and Security

# Visible emergency vehicles. Safer emergency stops.

Make safety the priority with 3M™ Vehicle Safety Markings Series 823i. Markings are available in a variety of colors, including chevron, to keep police, fire, and other emergency vehicles visible day and night.

## A Flexible Solution

3M™ Vehicle Safety Markings Series 823i are flexible and durable markings, that quickly and securely adhere to curved surfaces, making them ideal for emergency vehicle markings. The easy-to-work-with markings bond firmly to reduce the risk of buckling or popping off when applied in cold environments, keeping emergency markings clear and visible any time.

## A Brighter Appearance for Increased Visibility and Safety

Series 823i retains color, visual appearance, and brightness better than most beaded products. This means you replace the markings less frequently, providing long-lasting visibility and increased safety for your emergency vehicles. The fluorescent yellow-green option quickly grabs driver attention to provide high visibility for emergency vehicles at all hours, especially during dawn, dusk and inclement weather.

## Simple, Accurate Installation

To ensure your emergency vehicle markings only stick in the right place, 823i features 3M™ Controltac™ technology. The unique pattern in the adhesive minimizes initial contact with the substrate. This means the reflective markings can be re-applied until they are pressed down, allowing room for errors and easy install. Once 823i markings are in place, 3M™ Comply™ air release channels help the user quickly adhere them bubble-free.

## Guaranteed Durability

3M™ Vehicle Safety Markings Series 823i come with a three-year warranty. For detailed warranty information, please see the product bulletin.

## Visible Day and Night

Wide angularity and a variety of bright colors help keep emergency vehicles visible at day and night. 3M retroreflective technology offers vivid markings around the clock. Additionally, 3M™ Vehicle Safety Markings Series 823i meet or exceed many global traffic sign standards.

## Product Information

823i comes in a variety of colors to suit many uses, including a chevron pattern to clearly identify emergency vehicles. All 823i markings are compatible with 3M™ Process Color Series 990.
